MAVERICK ENGINEERING

FOR IMMEDIATE RELEASE

MAVERICK NAMED TO ENR TOP DESIGN FIRMS LIST

June 15, 2015 - Midland, TX: Maverick Engineering has been named to Engineering News Record's 2014 Texas & Louisiana Top Design Firms list. Maverick earned the ranking of #115 out of all design firms in both states, including architecture, interior design, and engineering firms. Maverick stands alone as the sole firm headquartered in Midland to earn a spot on the list, which ranks companies based on annual regional revenue and specifies percentage of revenue based on market sector.

This ranking is a significant accomplishment for Maverick, which has been in operation for just over two years and only has a single office location. Many of the other firms on the Top Design Firms list have multiple office locations, specialize in multiple design disciplines, and have been established for a much longer period of time. According to ENR, design firms in both Texas and Louisiana have benefitted from increased needs for transportation projects and continued demand for energy, infrastructure, education, and healthcare developments.

"I'm extremely proud of each and every one on the Maverick Team," says Maverick's Principal Engineer, Andrew Mellen. "The quality and professionalism we present is key to the success of our endeavors." Maverick provides a full range of civil engineering and development consulting services to both private and public sector clients.
