

OIL FIELD SERVICES

For oil field sites and related developments, Maverick is trusted to deliver projects that respect the time and budget constraints of our clients. Our focus is on fostering a quality standard of living for surrounding neighbors while ensuring the safety and accessibility of your site.

PLANNING

We want to help you make the most of your land. We'll assess the feasibility of your visions and create a solution that meets your goals and budget.

- General Plans
- Location Maps
- Master Plans
- Site & Utilization Design Strategies

HYDROLOGY

From storm water engineering to wastewater flow analysis, we can provide a comprehensive look at the hydraulics of your site.

- Flood Plain Analysis
- Channel Design
- Drainage Reports
- Master Drainage Studies
- LOMR/CLOMR
- Culvert and Storm Drain Design

FULL CIVIL LAND DEVELOPMENT ENGINEERING

We offer a full range of services to carry you from conceptualization to construction. Maverick takes a simple, straightforward approach to realizing the goals for your land.

- Survey Coordination
- Spill Prevention, Control and Countermeasure Plan (SPCC)
- Earthworks
- Storm Water Pollution Prevention Plan
- Paving Plans

PROJECT MANAGEMENT

Maverick will serve as the liaison between different parties involved and represent your project on your behalf, while respecting your time, budget, and goals.

- Cost Estimates
- Due Diligence
- Site Estimates
- Contractor Coordination
