MAVERICK ENGINEERING

FOR IMMEDIATE RELEASE

MAVERICK LAUNCHES WATER RESOURCES DIVISION

(February 15, 2016) – Maverick Engineering welcomes Ralph E. Truszkowski, P.E., who will serve as principal engineer of Maverick’s new Water Resources division based in Midland, Texas. In his new role, Ralph will provide strategic vision, guidance and client development for Maverick’s new service line. In addition to providing engineering consulting services, Ralph will help to further Maverick’s growth in the Permian Basin.

“We are delighted to add Ralph to our team,” says firm Principal Andrew Mellen. “Not only does Ralph bring a wealth of experience and depth to Maverick; he allows us to offer services to our clients that we were previously unable to provide in-house.”

Ralph brings more than 30 years of experience in the management and design of municipal infrastructure including water, wastewater and storage systems. He has extensive experience working for both public entities and as a consulting engineer in private practice. Ralph is a member of the American Water Works Association, Texas Water Utility Association, National Society of Professional Engineers, American Society of Civil Engineers, Texas Desalination Association, and Texas Municipal League.

Ralph holds a degree in Civil Engineering from Texas Tech University.
